ITEM NO. 3 TO CONSIDER PERFORMANCE OF THE INSTITUTION.

7. Explaining the performance of the Institution Chairman EOBI informed the Board that over the last five years the aggregate increase in the contributions remained 9% while the increase in benefit was more than 24%. He stressed that the Institution has to take measures to narrow down the gap. It has to strive hard for growth of the contribution income through improvement in administrative efficiency and also to review the pension scheme to make it viable after actuarial valuation.

8. He further informed the Board that the visits of the field officers to the establishment have been restricted they have been entrusted the work of data building. The Institution has standardized the Assessment procedure in accordance with law. In addition, various registers for recording assessment notices & demand notices etc have been introduced to ensure accuracy of arrears to streamline collection. The Regional Offices have been instructed to prepare lists

of defaulters, lists of establishments who have been found paying less contributions on the basis of evidence available with the Institution and lists of registerable cases who had not been registered. He informed the Board that by the grace of God the total collection of contribution in July this year was 28% higher than the figures of July last year. The employers realized their responsibilities under the law in view of data building exercise and persuasion through meetings, targeted approach and action based on solid evidence.

9. Mr. Muhammad Zaman said that the officers of the Institution had done their best in the past and evolved a procedure where they checked the defaulter establishments. Now they had been restrained from the inspection, which was a change. If some persons were not performing up to the mark, the entire system should not be revoked.

10. Replying to the observation of Mr. Zaman, the Chairman said that for effective monitoring of the performances an objective criteria for performance evaluation on scientific lines has been devised to rate the field officials on the basis of their actual performance. In addition to this for encouragement and boosting the zeal of officers a group incentive system is proposed to be introduced. If the Zonal Office, Regional Office or the Divisions related with generation of income of the Institution i.e. Investment, Real Estate etc, raise the collection of contribution or income from investment of the Institution and the rental income from the property including the capital gain thereon by 30% from the previous year, a reasonable percentage, as approved by the Board, of the amount in excess of benchmark over and above 30%, , should be distributed amongst the officials of the respective Zonal/Regional Office or the Division as the case may be. For award of group incentive the whole office, i.e. a Division/Zone/Region shall be treated as a unit and not the individual officer. The Field Office shall be treated as an integral part of the respective Regional Office. Similarly bench marks of performance for Finance, Audit and General Services Divisions shall be to curtail the Revenue Expenditure of the Institution by at least 10% from the previous year. They shall be entitled to a reasonable percentage of the saved amount, approved by the Board, exceeding 10% which shall be distributed amongst the officials of the respective Divisions.

The performance of other Divisions shall be adjudged for the meritorious reward of the fixed amount for the efficient performance of their work and achievement of the mile stones of the action plan framed on the basis of Institutional strategy. However the amount of incentive or reward should be set off against the payment of bonus due if any under the rules.
